### 21. Fair Value Measurements

The carrying amounts of the Group's financial assets and financial liabilities as reflected in the condensed consolidated statement of financial position approximate their respective fair values.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value:

- |                 |  |
|-----------------|--|
| Level 1 inputs: | quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.    |
| Level 2 inputs: | inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly. |
| Level 3 inputs: | unobservable inputs for the asset or liability.  |

The Group's policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.

## Management Discussion and Analysis

The distribution, trading and processing business contributed to the majority of the Group's revenue in the Interim Period. Iron ore trading represented the main commodity products of the distribution, trading and processing business. During the Interim Period, we also had other commodities trading such as chrome ore, nickel ore, steel products and chemical products. Revenue from the distribution, trading and processing business decreased from approximately HK\$26,157,033,000 in the Corresponding Period to approximately HK\$9,737,116,000 in the Interim Period. The decrease was mainly due to the decrease in trading volume of silver and gold ingots, which ceased operations since the second half of 2024.

During the Interim Period, the Group recorded revenues from the provision of financial services of approximately HK\$395,372,000 (2024: approximately HK\$425,441,000). The decrease in revenue during the Interim Period was due to the decrease of the trading activities.

Gross profit of the Group decreased from approximately HK\$625,085,000 in the Interim Period to approximately HK\$370,913,000 in the Corresponding Period, mainly due to the decrease in the trading activities in the distribution, trading and processing segment.

Other gains of approximately HK\$56,409,000 (2024: other losses of approximately HK\$146,662,000) were recorded during the Interim Period. Interest income on bank deposits totalling HK\$38,017,000 (2024: approximately HK\$55,960,000) was recorded during the Interim Period. Interest income decreased during the Interim Period due to the decrease in interest rate. Also, exchange gains amounted to approximately HK\$4,717,000 during the Interim Period (2024: exchange loss of HK\$36,007,000). Besides, during the Interim Period, there was no provision for the losses due to the suspected misappropriation of funds in the SG subsidiary (2024: HK\$167,660,000).

Selling and distribution expenses of approximately HK\$17,261,000 (2024: approximately HK\$22,884,000) were incurred during the Interim Period, mainly attributable to the charges paid when importing cargoes into China.

Administrative expenses decreased from approximately HK\$163,629,000 during the Interim Period to approximately HK\$137,041,000 in the Corresponding Period, mainly due to the drop in staff cost.

Finance costs of approximately HK\$8,865,000 (2024: approximately HK\$14,637,000) were incurred during the Interim Period for the factoring of the Group's trade receivables and for the settlement of interests arising from outstanding trust receipt loans.

## Management Discussion and Analysis

Share of profits of associates totalling HK\$140,354,000 (2024: HK\$64,811,000) was recorded during the Interim Period. They mainly arose from the share of profits of associates named 連雲港恆鑫通礦業有限公司 (Lianyungang Hengxintong Mining Co., Ltd.\*), Green Estee Pte. Ltd. and 山東能源集團榮暉國際貿易有限公司. The increase was due to the increase in the sharing of profits of the associate of Green Estee Pte. Ltd..

Income tax expense amounted to approximately HK\$33,264,000 in the Interim Period (2024: HK\$32,900,000).

The net profit for the Interim Period rose from around HK\$309,184,000 in the Corresponding Period to approximately HK\$369,906,000 in the Interim Period. The increase in net profit was primarily due to the absence of the provision for losses related to suspected misappropriation of funds in a non-wholly owned subsidiary in Singapore during the Interim Period, as well as the rise in the sharing of profits from associates.

The Group recorded a basic earnings per share of approximately HK2.39 cents in the Interim Period as compared to a basic earnings per share of approximately HK2.19 cents in the Corresponding Period.

# Management Discussion and Analysis

## Principal Risks and Uncertainties

### Commodities price risk

The Group's revenue and profit for the period were affected by fluctuations in the commodities price as our goods are sold at the market prices and such fluctuation is beyond our control. The considerable fluctuation of commodities price would lead to the Group's instability in operating results, especially in the event of a significant drop in commodities price which would have an adverse impact to the Group's operating results.

### Exposure to fluctuation in exchange rates

The Group conducts its distribution and trading business in United States Dollars ("US\$") and Renminbi ("RMB"). Foreign currency exposure to US\$ is minimal, as the Hong Kong Dollars ("HK\$") is pegged to the US\$. The Group is exposed to fluctuation of transactions denominated in RMB. The Group monitors its exposure to foreign currency exchange risk on an ongoing basis.

### Counterparty credit and performance risk

The Group continuously monitors the credit quality of our counterparties and seeks to reduce the risk of customer non-performance by requiring credit support from creditworthy financial institutions including making extensive use of credit enhancement products, such as letter of credit.

### Interest rate risk

The Group is exposed to various risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its assets and liabilities and cash flows. Floating rate debt which is predominantly used to fund fast turning working capital is primarily based on US\$ SOFR plus an appropriate premium. Accordingly, prevailing market interest rates are continuously factored into transactional pricing and terms.

### Legal, regulatory and compliance risk

Legal, regulatory and compliance risk includes the risk of legal or regulatory sanctions, material financial loss including fines, penalties, judgments, damages and/or settlements, or loss to reputation the Group may suffer as a result of our failure to comply with laws, regulations, rules, related self-regulatory organisation standards and codes of conduct applicable to our business activities. This risk also includes contractual and commercial risk such as the risk that a counterparty's performance obligations will be unenforceable. In today's environment of rapid and possibly transformational regulatory change, the Group also view regulatory change as a component of legal, regulatory and compliance risk.

## Management Discussion and Analysis

The financial services industry is subject to extensive regulation, which is undergoing major changes that will impact our business.

The Group oversees potential compliance risks, such as insider dealing, money laundering, on a regular basis. With the support of external professional advisers where appropriate, the Group monitors whether and the extent to which additional regulatory requirements apply as a result of the growth or expansion of our operations in financial services business.

Like other major financial services firms, the Group is subject to extensive regulations, which significantly affect the way the Group do business and can restrict the scope of our existing businesses and limit our ability to expand our product offerings and pursue certain investments. The Group is and will continue to be subject to a more complex regulatory framework, and will incur costs to comply with new requirements as well as to monitor for compliance in the future.

### Price risk

The Group's financial assets at fair value through profit or loss and derivative instruments are measured at fair value at the end of reporting period. Therefore, the Group is exposed to equity security and forward contract price risk. The Group manages this exposure by maintaining a portfolio of investments with different risk profiles.

### Liquidity and Financial Resources

As at 30 June 2025, the Group had an undrawn banking letter of credit limit totalling US\$721,344,000 equivalent to approximately HK\$5,626,483,000 (31 December 2024: US\$603,752,000, equivalent to approximately HK\$4,709,266,000).
